I am outraged by the NAB petition to stop XM from providing Instant Traffic & Weather.

I find this service invaluable because it is the one place that I can go for this information any time fo day. It also allows me to easily get information when I travel to other cities.

Satellite radio provides a breadth and quality of programming that is not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

I cannot imagine why you would even consider blocking a service that people willing choose and pay for over other lesser quality free broadcasts. why not block cable TV while you are at it?
